

Stabilized fertiliser

Product No: 9407 - ENTEC 21 solub

Storage: Keep dry and protect from sun. Keep out of the reach of children and animals. Do not store fertilizer near watercourses or waste water. Keep the fertiliser covered, seal bags well after use.

Application: 1-3 times within the growing season. Application rates must meet the crop requirements. The nutrient content of the soil and previous cultivations must also be considered to avoid over-application. The recommendations of the official advisory service and local agronomists should be followed. Fertilizers with a nitrification inhibitor reduce the risk of nitrate leaching, allow earlier fertilization, and reduce the amount of nitrogen. The effect of the nitrification inhibitor depends on the climate, weather and soil and may last for 4-10 weeks."

bulk density: approx. 1,1 t/m³
screen analysis: min 90% between 0,2 mm and 3,0 mm
mean diameter: 0,8 mm
H₂O-Content: max. 0,2%

Producer: 5de Havendok, Zwarte Weg 60; Kaai 371+373, BE-2030 Antwerp
